

Curriculum Vitae

Name: Qasem Saleh Al-Shorman

Media Researcher | Master's in Mass Communication | IT Instructor | Computer Engineering Specialist

About Me

I am a researcher and educator with a Master's degree in Mass Communication from Yarmouk University, Jordan, graduating with a GPA of 84.8/100 (Very Good). My thesis focused on 'Faculty Members' Attitudes in Jordanian Media Colleges towards Adopting Artificial Intelligence Technologies: A Field Study,' and I published a related research paper in QAF Journal. I have professional experience as an IT Instructor in the Royal Jordanian Air Force and as a Computer Technician at King Hussein College. My background combines media, journalism, and computer engineering. I am passionate about integrating AI technologies in education and digital journalism, and I am also the founder of 'Baseer,' an innovative assistive technology concept for the visually impaired.

Education

M.A. in Mass Communication, Yarmouk University, Jordan (2025) – GPA: 84.8/100.
B.A. in Journalism and Media – Electronic Journalism, Arab Open University (2016–2020).
Diploma in Computer Engineering, Prince Faisal Technical College, Royal Jordanian Air Force (2012–2015).
Diploma in Information Technology, Al-Balqa Applied University (2012–2014).

Experience

IT Instructor – Royal Jordanian Air Force: Taught computer and IT courses to cadets, focusing on practical and theoretical aspects.
Computer Technician – King Hussein College: Provided technical support, maintenance, and troubleshooting for IT systems and computer labs.
Graduate Researcher – Yarmouk University: Conducted a field study on AI adoption in media education; published research in QAF Journal.

Skills

- Academic Research
- Media & Journalism
- Teaching & Training (IT & Media)
- Artificial Intelligence in Education
- Computer Engineering & Maintenance
- Digital Communication
- Content Writing & Editing

Languages

- Arabic (Native)
- English (Good – Academic & Research Proficiency)

Accomplishments

- Published research in QAF Journal.
- Founder of the 'Baseer App' concept – AI-based assistive technology for the visually impaired.
- Combined expertise in media, education, and IT.
